

Inspections for VA Medical Centers

Is your medical center using data to improve service to Veterans?

- Are you using a paper checklist or inconsistently logging inspections, quality assurance, and observations?
- Are paper inspections bogging down your reporting ability?
- Are you looking for a better way to track inspections and follow VA directives?

With ExAM4Inspections you can improve compliance, safety, and experiences for employees, Veterans, and their families.

Sections

Health Care

Facilitate digital inspections and surveys to ensure quality and safety across your center.

Building/Construction

Ensure inspections and assessments at construction sites and buildings are up to code and that contractors perform to expectations.

Facilities & Housing

Transform property and facility inspections to help meet quality, health, and safety requirements at over 300 organizations.

Use Cases

Construction Safety Inspections (CSI)

- Health & Safety Inspections
- Quality Control
- Violation Tracking/Logs

Environmental Management Services (EMS)

- Room Cleaning Logs
- Supervisor Review Inspections

Nutrition and Food Services (NFS)

- Kitchen Audits
- Spot Audits
- Health and Safety Logs

Understanding ExAM

ExAM (Extensible Assessment Manager) leverages our “Assess Anything” technology on top of the Salesforce platform to improve data collections and simplify business processes across a wide variety of use cases. ExAM’s capabilities help organizations perform inspections, audits, assessments, and complex surveys.

60+
VA Hospitals

In Office

Pre-built Reporting

This includes standard reports and dashboards, intuitive analysis features and the capability to leverage bleeding edge technology like Einstein's Predictive Analytics.

Proven Inspection Workflows

A comprehensive suite of tools for developing inspection, quality assurance, and data collection forms and interfaces.

Easy to Configure

Provides administrators with an easy to use interface for configuring the ExAM app to ensure your team gets the information they need in the field.

Secure

ExAM is used in secure federal and healthcare environments which is why we built it on Salesforce platform that meets stringent standard like FedRAMP, DoD IL4, HIPAA and many others.

Ease of Use

Offline

Perform inspections offline and in the field

Mobile

iOS and Android apps available

Powerful

Take pictures, collect signatures, enable decision trees

How It Works?

ExAM4Inspections is an application that works on the Salesforce Platform that provides a configurable inspection use case specific solution for the VA and it's network of hospitals. There are a lot of non-government approved systems that may involve workarounds since they are not able to interface with the VA network, our ExAM4Inspection tool requires users to have a PIV card to set up an account:
